

An EHR as Personalized as the Neurology Care You Provide

NextGen® Neurology Suite

Neurology practices face unique challenges that can be addressed by integrating personalized workflows and specialized documentation templates.

Benefit from neurology features and content that overlay the award-winning, CURES-certified NextGen® Enterprise EHR.

Features of our neurology-specific solution:

- Injection & Infusion Suite
- Fully integrated medication inventory control system (MICS)
- Comprehensive neuro-assessment tools
- Clinical research template
- Device connectivity
- Sleep interpretation and billing functionality

When you streamline documentation, your care team can better manage multiple neurology procedures and ensure quality care at every step of the patient's journey. Time-saving solutions such as mobile documentation, cloud hosting, and interoperability can also help drive clinical optimization.

All-encompassing benefits

Increase patient volume

Leverage mobile technology to improve the EHR user experience. NextGen® Ambient Assist for NextGen® Mobile utilizes ambient listening technology to securely convert natural patient-provider conversations into structured SOAP notes, saving providers up to two hours per day.

With NextGen Mobile, neurologists can easily complete clinical tasks, document detailed patient encounters, and open doors to more patients in a single day.

Share patient data with ease

The ability to seamlessly share patient data, such as PACS, lab results, and other patient data, with providers in your community is vital to the long-term success of the care you provide. Solutions like NextGen® Share make it possible to effortlessly share vital patient data across many different systems and locations.

Benefits (cont.)

Improve patient engagement

The NextGen® Closed Loop™ Patient & Practice Experience brings the best solutions for patient engagement, payment collections, and claims processing all under one unified platform.

This integration improves both participation and satisfaction for patients, from access to intake, the visit, care coordination, and ongoing health management.

Maximize enterprise capabilities

Enterprise architecture includes a single source of truth, analytics, and real-time reporting. No layer of complexity is too great to manage.

Reduce security risks

Provided in collaboration with Amazon Web Services (AWS), NextGen® Managed Cloud Services help you gain peace of mind by making your data as secure as possible. Our team of experts work to optimize your cloud environment and provide 24/7 support to ensure your data is protected.

Receive specialty-specific tech support

With a clear understanding of neurological care, we work closely with your care team to ensure your practice maximizes the benefits of our solutions.

Other highlights

Bring in more of the money you've earned

The award-winning NextGen® Enterprise PM and billing platform is essential to maintaining a financially lucrative practice. Automate routine billing processes and decrease denials with the Black Book top-ranked PM solution for physician groups 1–50+ providers for seven consecutive years.

Take advantage of intelligent quick orders

Quick orders use crowdsourcing to utilize intelligent provider-focused orders to task support staff, start a medication, and provide the documentation to track patients from order to outcome.

Get shortcuts to reduce clicks

Incorporate keyboard shortcut technology to launch quick text with simple keystrokes—the answer to eliminating clicks.

Reduce no-shows

Invite patients to opt-in to in-office or virtual visit waiting lists and automatically ask patients who previously canceled to reschedule appointments.
